

- Please inform the school if your student has a case of head lice.
- After treatment, students must be accompanied by a parent/guardian and checked by the school nurse before returning to class. There must not be any live lice found, and there must be evidence of progress in removing all nits.
- Bring proof of treatment to health office if your student has been treated by a lice removal service.
- For further information concerning lice and treatment, the following websites have good information and services:
